

DESCRIPTION

The HI-84200 is a six channel discrete-to-digital interface device with inputs configured to sense Open / Ground discrete signals. All sense inputs are internally lightning protected to RTCA/DO160G, Section 22 Level 3 Pin Injection Test Waveform Set A (3 & 4), Set B (3 & 5A) and Set Z (3 & 5B) without using external components. The device outputs are CMOS / TTL compatible and may be disabled (tri-state) using the \overline{CE} and \overline{OE} pins.

The HI-84200 is a drop-in replacement for the DEI1026.

The HI-84230 is an equivalent device with eight Open / Ground sense channels.
